

FLEXIDC

Fast charging for today's commercial needs.

FlexiDC is our answer to commercial EV charging needs. Pick your speed at 24, 50, 100 or 200 kW. Gives a bus, truck or car the energy it needs to take on the world. Have it on the wall or on a pedestal. Backed up with our rigorous software systems to withstand even the most demanding commercial use.

FLEXIDC

Fast charging for today's commercial needs.

FULL CHARGE IN 30

Keep customers happy with a lightning-quick 30-minute charge with the 60kW model. Comes in five speeds: 20kW, 30kW, 40kW, 50kW and 60kW. Fully charged in less than the time it takes to eat your lunch.

PERFECT FOR PUBLIC LOCATIONS

Easily charge your fleet with the FlexiDC. The ideal solution for commercial charging like public transportation and transit solutions.

COST-SAVING FEATURES

The charger works very efficiently that it reduces your costs for maintenance.

VERSATILE INSTALLATION

Making EV charging possible, whether you have a wall or not. Wall-mount or pedestal options available.

PAY IT YOUR WAY

We make it easy to pay with options like Mobile NFC, QR Code, Octopus Card, Visa payWave, Mastercard contactless and our mobile app.

OPTIMISED CHARGING

FlexiDC pairs with our Load Management System, optimising charging speed, current and power for safety.

*Subject to charging payment conditions
